

Building Malaysia's People's Economy

12Gig is a Gigger-centred services marketplace that connects independent service providers with individuals, families, businesses, and institutions that need their work.

Based in Sabah and built for the Malaysian market, 12Gig helps Giggers create a profile, showcase skills, set service offerings and prices, receive bookings, and build reputation through transactions and customer reviews.

WHO WE ARE

A more organised digital channel for local skills

12Gig Sdn. Bhd. was established to close a clear gap in the gig economy. Many independent workers and service providers have skills that can generate income, yet they still rely on personal networks, social media, and unstructured arrangements to find customers.

12Gig builds a more organised digital marketplace. Through the platform, Giggers can introduce themselves, describe their scope of work, offer prices, and build a service record. Users can search, compare, and choose providers based on their needs.

Our approach begins in Sabah, with the aspiration to grow as a services platform that remains relevant to communities across Malaysia.

THE PROBLEM WE ADDRESS

Skills exist. A structured channel is still missing.

A large share of gig-economy opportunity in Malaysia is still concentrated in e-hailing and food delivery. Outside those sectors, many skilled people still do not have a dedicated digital channel to offer their services in an organised way.

At the same time, households, small businesses, and institutions often struggle to find suitable local providers whose scope of work is clear and who can be assessed from previous customer experience.

12Gig was created to close the gap between skills available in the community and real demand for services.

HOW 12GIG WORKS

One platform for Giggers, users, and partners

For Giggers

Giggers can build a profile, publish services, set prices, receive enquiries or bookings, manage assignments, and build reputation through customer reviews.

For Users

Users can describe their needs, find services, compare providers, make bookings, and keep a record of the engagement through the platform.

For Institutions and Strategic Partners

12Gig can collaborate on participant recruitment, digital profile development, service publishing, market-matching activities, participation monitoring, and programme outcome review.

SERVICE CLUSTERS

Services close to daily life and business operations

Offerings on 12Gig cover services close to everyday community needs and business operations, including:

Home and maintenance services	Cleaning and household support
Beauty, personal care, and wellness	Events and function support
Digital and creative services	Business support services
Community and rural services	

Availability of a service depends on location and the Giggers who are active at the time.

THE VALUE 12GIG BRINGS

Market access, choice, and organised records

Market access for local skills

Helping people turn practical and professional skills into service offerings that customers can find.

Provider choice in the user's hands

Users can review profiles, service scope, prices, and feedback before making a choice.

A more organised record of work

Enquiries, bookings, assignment progress, payments, and reviews can be handled through the platform ecosystem, subject to available features.

Support for economic development programmes

The 12Gig model suits collaboration with education institutions, TVET, development agencies, associations, communities, and organisations that want to help participants enter the services market.

WHO WE SERVE

12Gig is built for

Individuals looking for a service provider
Giggers, freelancers, and independent service providers
Households and communities
Microenterprises, SMEs, and offices
Property managers and organisations
Education institutions and TVET
Government agencies, development bodies, and community organisations

PARTNERSHIP OPPORTUNITIES

Income opportunities based on skills

12Gig welcomes discussions with organisations that want to develop skill-based income opportunities. Forms of collaboration may include:

Recruiting and preparing participants as Giggers
Training in digital profiles, service design, pricing, and customer ethics
Pilot programmes by community, institution, or area
Activating user groups to create early demand
Cross-promotion, community activities, and market matching

Participation monitoring and outcome reporting based on an agreed scope

Each proposal is assessed by objective, target group, location, delivery capacity, and the results to be achieved.

LEADERSHIP

The people building 12Gig

Syed Abdullah Mohamad - Founder and Head of Business Development

Leads 12Gig's business direction, marketplace model, institutional relationships, and the formation of strategic partnerships.

Mohd Redzuan Hiew bin Mohd Daud - Co-Founder, Technical

Involved from the idea stage in 2024 and responsible for the platform's development and technical direction. He is a Cybersecurity graduate of the University Malaysia of Computer Science and Engineering (UNIMY).

Elaina Sukaimi - Co-Founder and Head of Operations

Involved from the idea stage and oversees operations development, programme coordination, and delivery of activities with communities and institutions. She is a graduate of Universiti Malaya.

THE 12GIG JOURNEY

From idea to company and market activation

2024

The idea and early development of the 12Gig model began.

2026

12Gig Sdn. Bhd. was registered and the platform moved through development, user testing, and market activation.

Current focus

Strengthening service offerings, user experience, partnership networks, and transaction evidence before wider expansion.
